LAWN GRASS SEEDS

Making a lawn is a job that most of us only have to undertake once or twice in a life-time. We build lawns for permanence, and for that reason we SHOULD go about it with the utmost care. The soil should be carefully prepared before planting the seeds.

It requires about 10 pounds of Blue Grass seed to 1,000 square feet (Bent seed about 5 pounds). Fertilize with a good commercial fertilizer such as Milorganite, Loma or Soiltone, using 100 pounds to 2,500 square feet and cover with Peat Moss. (1 bale covers about 800 square feet).

We are always pleased to help you with your lawn problems.

These prices are **NOT PREPAID**. If wanted by mail, include postage at the regular zone rates. **NO SALES TAX ON SEEDS.**

The SIMPSON SEED CO., warrants to the extent of the purchase price that seeds, plants or bulbs sold are described on the contained within recognized tolerances. Seller gives no other or further warranty, express or implied.
